closafe

Closafe is an innovative safety solution that integrates smart devices into workwear to minimize industrial hazards. Closafe identifies loose clothing, monitors worker collisions, alerts in the event of an emergency, and offers sufficient lighting.

With IoT connectivity and real-time notifications, Closafe enhances workplace safety by preventing accidents and enabling instant emergency response. The solution incorporates wearable sensors, intelligent lighting, and data analysis to effectively reduce occupational hazards.

Features

- Detection of loose clothes
- Impact and fall monitoring
- Alert of unconscious worker
- SOS manual triggering
- Automatic adjustable auxiliary light

Advantages

- **Prevents entanglement accidents:**
Alerts workers when sleeves or straps are loose and avoid dangers near revolving machines.
- **Provides immediate emergency response:**
Detects heavy impacts or loss of consciousness and informs safety personnel immediately.
- **Improves lighting in low light:**
Automatically activates onboard lights when ambient light is low.
- **Eases communication with workers:**
Allows easy triggering of SOS without complex controls.
- **Incident-based safety data:**
Analyzes incident patterns to enhance workplace hazard prevention.

Applications

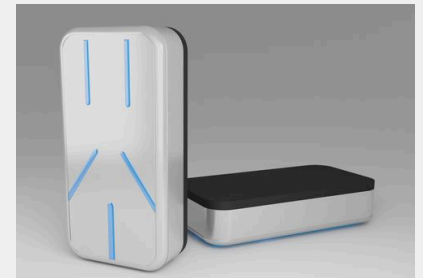

Production plants: Prevents hazards of machinery trapping and falls incidents in production lines

Construction areas: Monitors personnel safety in dark or irregular ground surface areas.

Warehouses & logistics areas: Prevents accidents from low visibility and heavy equipment collisions.

Mining & oil rigs areas: Enhances personnel protection from risks in harsh, remote workplaces with real-time alerts.

Emergency services: Helps firemen and rescue teams with impact sensing and SOS capabilities.

Target Markets

- Heavy industries: Factories and plants where there is extensive machinery interaction have a focus on accident prevention.
- Warehousing companies: Large warehousing companies welcome lighting automation as well as hazard alerts.
- Mining & energy industries: Hazardous conditions require innovative safety wearables for employee safety.
- Occupational safety vendors: Businesses that offer workplace safety solutions include Closafe in their systems.
